Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! I already pay upwards to \$200.00 a month for my phone services and other connected devices. There are already too many unexplained fees attached to my bills. Any time you guys want to claim more of my money, you invent some mythical tax or subservice to tack on to my bill.

The truth is that the phone services make more \$ than the oil companies and they make more than the Dallas Cowboys. I own a small one man business and I'm struggling to stay alive. My phone costs too much now. Why don't you all find a way to knock a hundred bucks off of my bill and earn the money you already get.

yours truly Terry Kuntz

Sincerely,

Terry Kuntz
